1. PURPOSE

This Policy of APPAK LLP relating to sustainable development (hereinafter referred to as the Policy) was developed in order to formalize the approach to the development of the corporate management system and determine the main goals, objectives, principles and priority areas of activity of APPAK LLP (hereinafter referred to as the Partnership) relating to sustainable development.

2. SCOPE

2.1. This Policy applies to all structural divisions of the Partnership and is mandatory for all employees of the Partnership.

3. TERMS, DEFINITIONS AND ABBREVIATIONS

3.1. **Interaction with stakeholders** - procedures and processes implemented in the Partnership in order to take into account the interests and needs of the stakeholders of the Partnership in its activities.

3.2. **Stakeholders** - participants, personnel, partners, creditors, suppliers of goods, works and services, consumers and other persons specified in the Stakeholder Map of the Partnership.

3.3. **Reporting relating to sustainable development** (non-financial reporting) - informational reflection of the activities of the Partnership relating to sustainable development by issuing systematic reporting on a range of issues relating to sustainable development and other issues that attract the attention of stakeholders.

3.4. **Regions of presence** – administrative-territorial units in which the Partnership operates.

3.5. **GRI standards** are sustainability reporting standards developed by the international organization Global Reporting Initiative.

3.6. **Sustainable development** i– development that meets the needs of today without jeopardizing the ability of future generations to meet their needs.

3.7. **Samruk-Kazyna JSC** - National Welfare Fund Samruk-Kazyna Joint Stock Company.

3.8. **NAC Kazatomprom JSC** - National Atomic Company Kazatomprom Joint Stock Company.

3.9. **UN** - United Nations Organization.

3.10. **ESG** - environmental, social and governance.

3.11. **GRI** - Global Reporting Initiative.

3.12. **ICMM** – International Council on Mining and Metals.

3.13. **WNA** - World Nuclear Association.

4. GENERAL PROVISIONS

4.1. This Policy is a fundamental internal corporate document reflecting the vision of the Partnership for the further development and improvement of activities relating to sustainable development.

4.2. This Policy is based on the notions of the social role and obligations arising from the mission and development program of the Partnership, its accepted ethical principles and corporate values.

4.3. This Policy has been developed in accordance with the legislation of the Republic of Kazakhstan, the Sustainable Development Reference Model for portfolio companies of Samruk-Kazyna JSC, the Corporate Policy of NAC Kazatomprom JSC relating to sustainable development, the Partnership Development Program and other internal documents of the Partnership, as well as with taking into account international standards and best industry practices relating to sustainable development.

4.4. A partnership 65% owned by NAC Kazatomprom JSC, the world's largest uranium producer, 25% Sumitomo Corporation, 10 % The Kansai electric power Co., Inc., recognizes the significant impact of its activities on the environment, people and livelihoods in the area where nuclear facilities are located, and takes specific measures to manage risks relating to sustainable development by developing practices and integrating the principles of sustainable development into its activities in order to:

- 4.4.1. consistent reduction of industrial impact on the environment;
- 4.4.2. environmental protection, including effective management of water and land resources, conservation of the ecosystem and biodiversity;
- 4.4.3. ensuring rational subsoil use;
- 4.4.4. improving productivity, energy and resource efficiency;
- 4.4.5. assistance in improving the socio-economic well-being of the regions of presence;
- 4.4.6. promoting access to affordable, reliable, sustainable and modern energy sources and improving energy security.

4.5. The Partnership seeks to implement the principles and values of sustainable development in all key aspects of its activities and comply with international standards and best industry practices relating to sustainable development.

4.6. The Partnership is aware that the development and improvement of sustainable development practices is a key factor in ensuring long-term stability, competitiveness and the ability to create additional value for all stakeholders.

5. GOALS, OBJECTIVES AND PRINCIPLES OF ACTIVITIES RELATING TO SUSTAINABLE DEVELOPMENT

5.1. Sustainable Development Goals and Objectives:

- 5.1.1. The goal of the Partnership relating to sustainable development is to implement the Partnership's Development Program in order to ensure sustainable growth of book value and create added value in the long term in the interests of all stakeholders through the active management of economic, social and environmental impact.
- 5.1.2. The key objectives of the implementation of the Policy are:
 - implementation of the task to improve the efficiency of corporate governance by implementing and complying with the principles of sustainable development and ESG;
 - formalizing the intentions and capabilities of the Partnership on the development of sustainable development practices and informing key stakeholders;
 - implementation and improvement of the corporate sustainable development management system.
- 5.1.3. The main objectives of the implementation of the Policy are:
 - determination of the main corporate principles for the implementation of the Policy, on which the activities of the Partnership relating to sustainable development will be built;
 - determination of priority areas of activity relating to sustainable development, taking into account the current state of development of sustainable development practices and the specifics of the Partnership's activities;
 - determination of approaches to integrating the principles of sustainable development into key aspects of the Partnership's activities and further improvement of the corporate practice of sustainable development management.

5.2. Principles of sustainable development

- 5.2.1. As part of its activities, the Partnership strives to comply with and demonstrate the principles of responsible and sustainable development and takes steps to implement the following principles of sustainable development in key aspects of its activities:

- **openness:** the Partnership is open to meetings, discussions and dialogue and strives to build long-term cooperation with stakeholders based on mutual interests, respect for rights and a balance between the interests of the Partnership and stakeholders;
- **accountability:** the Partnership is aware of its accountability for the impact on the economy, the environment and society and seeks to minimize the negative impact of its activities on the environment and society through careful use of resources, consistent reduction of emissions, waste, and the introduction of high-performance, energy- and resource-saving technologies ;
- **transparency:** the Partnership strives to ensure that the activities and decisions of the Partnership are clear and transparent to the parties concerned. The Partnership promptly discloses the information provided for by law and internal documents, taking into account the norms for the protection of confidential information;
- **ethical behavior:** the Partnership's decisions and actions are based on such values as respect, honesty, openness, team spirit and trust, integrity and fairness;
- **respect:** the Partnership respects the rights and interests of the interested parties, which follow from the legislation, concluded agreements, or arising within the framework of business relationships;
- **legality:** the Partnership's decisions, actions and behavior comply with the legislation of the Republic of Kazakhstan and decisions of the bodies of the Partnership;
- **observance of human rights:** the Partnership respects and contributes to the observance of human rights provided for by the Constitution of the Republic of Kazakhstan and international documents, such as the Universal Declaration of Human Rights;
- **intolerance to corruption:** the Partnership declares its absolute intolerance to corruption in any of its manifestations in cooperation with all interested parties;
- **No Conflict of Interest:** the Partnership recognizes that serious violations of a conflict of interest can damage the Partnership's reputation and undermine the confidence of members and other interested parties. When interacting with partners and stakeholders, the Partnership strives to act as honestly, conscientiously, fairly and loyally as possible, and takes measures to prevent, identify and eliminate conflicts of interest to ensure the impartial performance of their duties by the managers and employees of the Partnership;
- **personal example:** each of the employees of the Partnership contributes to the implementation of the principles of sustainable development every day in their actions, behavior and decision-making; officials and employees occupying managerial positions, by their personal example, should motivate them to implement the principles of sustainable development.

5.2.2. Ensuring effective sustainable development involves the implementation of a coordinated and balanced activity in accordance with the principles of sustainable development, focused on the creation and multiplication of long-term economic, social and environmental benefits:

- **economic area:** financial performance, increased productivity and operational efficiency, investment in intellectual capital, social investment;
- **environmental area:** environmental protection, energy efficiency and resource efficiency, waste and emissions management, biodiversity conservation;
- **social area:** occupational safety and health of employees, development of human capital, socio-economic development of regions and local communities.

5.2.3. The Partnership is aware of its responsibility in shaping the foundations of a

sustainable future and is making efforts to contribute to the achievement of the UN Global Sustainable Development Goals and the implementation of the principles of the UN Global Compact by consistently integrating the principles of sustainable development into business activities.

- 5.2.4. In order to integrate and practically implement the principles of sustainable development, the Partnership seeks to comply with and implement in its activities the best industry practices relating to sustainable development, including the key principles of the International Council on Mining and Metals (ICMM) and the World Nuclear Association (WNA), as well as consistent building up their competencies in partnership with the global community.
- 5.2.5. These principles of sustainable development serve as examples of good practices that are designed to ensure the sustainable development of the Partnership in the long term.
- 5.2.6. The Partnership strives to carry out its activities in accordance with the principles of corporate responsibility and sustainable development and adheres to common values and principles, regardless of the region of presence.
- 5.2.7. The Partnership seeks to implement the principles of sustainable development in its activities, including the integration of the principles into its documents, policies and procedures, and the formation of an appropriate corporate culture and business ethics.

6. MAIN ACTIVITIES OF THE PARTNERSHIP RELATING TO SUSTAINABLE DEVELOPMENT

6.1. The Partnership strives to ensure sustainable development and improve corporate sustainability management practices by increasing the level of cooperation between key stakeholders and the consistent integration of sustainable development principles throughout the Partnership.

6.2. The Partnership strives to integrate the principles of sustainable development into its activities by effectively managing risks relating to sustainable development and identifying new opportunities for further development, improving efficiency and competitiveness, stimulating growth and innovation, as well as through the development and implementation of activities in the following main areas of activity relating to sustainable development:

- economic sustainability;
- development of human capital and culture;
- labor protection and industrial safety;
- environmental responsibility;
- scientific-technical and innovative-technological development;
- effective corporate governance and risk culture;
- high ethical standards and anti-corruption;
- responsible purchasing;
- responsible business conduct – interaction with stakeholders, local communities and accountability.

6.3. When developing and implementing activities in priority areas of activity relating to sustainable development, the Partnership is looking for opportunities to form rational and effective business cases for social and environmental investments, which are based on considerations of financial feasibility and rational business models.

6.4. Economic sustainability

- 6.4.1. The sustainable development of the Partnership depends on the ability to ensure the efficiency of activities and conditions for sustainable long-term economic growth,

while maintaining a balance of economic, environmental and social consequences of activities.

- 6.4.2. Increasing economic efficiency and ensuring long-term economic growth is a priority for sustainable development, since the economically optimal use of limited resources and maintaining economic sustainability ensures the availability of material resources for the implementation of measures relating to corporate social responsibility and sustainable development.
- 6.4.3. The activities of the Partnership to improve economic sustainability and efficiency are aimed at the implementation of tasks to improve production and operational efficiency and the implementation of the process of continuous improvement of activities (business transformation) of the Partnership, including through the implementation of the following measures:
- development and implementation of measures to control and optimize operating and capital costs;
 - developing work methods that create greater operational flexibility;
 - introduction of resource-saving technologies and innovations;
 - digitalization of production activities, integrated automation, robotization of technological processes and the use of other SMART technologies;
 - applying the principles of continuous improvement and lean production, as well as other best manufacturing practices;
 - identifying and focusing on business lines with high potential for value creation;
 - business reengineering, automation and optimization of its processes, as well as the introduction of new targeted processes aimed at improving business efficiency;
 - increasing transparency and manageability of assets and simplifying the procedure for making management decisions;
 - conscientious fulfillment of obligations to pay legally established taxes, fees and other obligatory payments.

6.5. Development of human capital and culture

- 6.5.1. The partnership recognizes that the continuous development of human capital is the basis of sustainable development and one of the competitive advantages. The long-term success of the Partnership's activities depends on the efforts, knowledge and professional competencies of key highly qualified personnel, as well as on the Partnership's ability to attract, develop, accumulate and retain such human capital.
- 6.5.2. The activities of the Partnership for the Development of Human Capital and Corporate Culture are aimed at effective personnel management and the formation of an appropriate corporate culture to achieve assigned goals and objectives, including through the implementation of measures in the following areas:
- ensuring equal opportunities and working conditions to attract, develop and retain the most highly qualified specialists in key areas of activity;
 - assistance in realizing the professional, career and personal potential of employees, including through investments in training, development and advanced training of personnel;
 - improvement of the remuneration system and the implementation of an effective motivation system that contributes to improving the efficiency of labor organization and staff productivity;
 - formation of a personnel reserve and ensuring continuity;
 - attracting young professionals and developing the practice of labor mentoring;

- support for young professionals and the formation of an active life position in them by creating conditions for the full-fledged spiritual, cultural, educational, professional and physical development of young people;
- implementation of social support measures for employees aimed at preserving and maintaining health, improving living conditions and the quality of life of employees and their families;
- ensuring stability in labor collectives;
- improving the corporate culture aimed at encouraging the implementation and observance of the principles of sustainable development.

6.5.3. The Partnership is making efforts to integrate sustainable development goals into performance appraisal and the remuneration system, and is also implementing measures to introduce additional motivational incentives that reflect the specific role and contribution of the Partnership's structural divisions and employees in achieving the relevant sustainable development goals.

6.5.4. All obligations assumed by the Partnership for the implementation of measures to develop human capital and culture are specified in the provisions of the Collective Contract, Personnel Policy, Corporate Social Responsibility Policy and the Code of Ethics and Compliance of the Partnership.

6.6. Labor protection and industrial safety

6.6.1. When carrying out production activities, the Partnership is fully aware of the full responsibility for creating and maintaining safe working conditions and ensuring industrial safety, makes every effort to achieve a “zero level” of injuries and prevent accidents and emergencies at work.

6.6.2. Improving the safety culture to the level of the best world practices is a priority task of the Partnership and in order to implement it, the Partnership implements the entire available and practically implemented set of measures to prevent accidents and incidents, injuries and deterioration in the health of workers, as well as introduces the latest technologies, develops and implements targeted programs and measures relating to industrial safety and labor protection aimed at:

- increasing the level of conscious compliance by employees and managers of all levels of safety, labor protection and the environment;
- increasing the interest, awareness and competence of management, senior employees and employees in ensuring safety, labor protection and the environment;
- ensuring openness and transparency of activities relating to labor protection, environmental protection, industrial and radiation safety;
- compliance with the Code of Labor Protection and Safety of the Partnership;
- prevention of industrial accidents and incidents, ensuring the elimination of their consequences;
- implementing a whistleblowing program and promoting a culture of freedom of expression (“speak-up culture”), especially in relation to health, safety and environmental issues.

6.6.3. The general goals relating to industrial safety and labor protection, as well as the obligations that the Partnership assumes to achieve its goals, are reflected in the provisions of the Policy relating to labor protection, environmental protection, nuclear and radiation safety, the Code of labor protection and safety and Policies of corporate social responsibility of the Partnership.

6.7. Environmental responsibility

- 6.7.1. The Partnership, as part of its production activities, is aware of the responsibility for the impact on the environment, the quality of life and health of the population and assumes obligations to fully maintain environmental safety and preserve the natural environment in the places where the Partnership's production activities are carried out and strives to achieve a "zero level" of environmental impact.
- 6.7.2. The partnership seeks to ensure effective and constructive interaction with key stakeholders - with state authorities and labor collectives, business partners and the public, expert organizations - to develop solutions to problems relating to environmental protection and rational use of resources.
- 6.7.3. The Partnership is making efforts to comply with the principles of environmental responsibility, careful and rational use of natural resources and minimization of environmental risks, including the implementation of targeted programs and activities relating to environmental protection aimed at:
- strict compliance with the requirements of the current legislation of the Republic of Kazakhstan relating to environmental protection and environmental safety;
 - minimization of the impact of production activities on the quality of life of the population and the environment, maintaining a favorable state of the natural environment and human habitat in the regions where the production activities of the Partnership are carried out;
 - prevention of industrial accidents and emergency pollution of the environment, ensuring the elimination of their consequences;
 - rational use, restoration and protection of natural resources, conservation of biological diversity;
 - development and improvement of tools and solutions to improve the efficiency of industrial waste management, including waste collection, processing and disposal processes in order to minimize or prevent the generation of industrial waste, the introduction of low-waste technologies and the use of environmentally friendly methods of industrial waste disposal;
 - prevention of environmental damage from industrial and economic activities;
 - improvement of the management system for environmental protection and resource-saving activities and environmental training of employees, introduction of the best world practices relating to environmental safety.
- 6.7.4. The Partnership seeks to introduce and integrate environmental responsibility tools into the activities and practices of corporate governance in order not only to comply with regulatory and legislative requirements and minimize environmental risks, but also to develop and implement practical approaches to improve business management efficiency, contributing to productivity growth and economic efficiency.
- 6.7.5. The main goals and obligations of the Partnership in the framework of the implementation of environmental responsibility are contained in the provisions of the Policy relating to labor protection, environmental protection, ensuring nuclear and radiation safety and the Policy of corporate social responsibility of the Partnership.

6.8. Scientific-technical and innovative-technological development

- 6.8.1. In order to ensure long-term competitiveness in the world market, diversify its core business, as well as increase production and operational efficiency, the Partnership implements measures to consistently develop research, technology and innovation potential.
- 6.8.2. Within the framework of scientific, technical and innovative and technological

development, the Partnership implements targeted programs and activities aimed at:

- creation and development of a modern scientific and technical base;
- carrying out research and development work, including with the involvement of research centers;
- commercialization of the results of scientific, technical and innovative activities;
- development, commercialization, transfer, implementation and support of innovative scientific and technical developments relating to nuclear fuel cycle, geology and drilling, as well as mining and processing of rare and rare earth metals;
- scientific, technical and innovative support of the energy and desalination complexes;
- development of the accumulated intellectual capital, including the retention and training of highly qualified scientific and engineering personnel, as well as the consolidation and enhancement of nuclear technology knowledge and competencies;
- organization of mutually beneficial scientific and technical cooperation by forming innovative partnerships and creating alliances with leading companies, world scientific and educational centers.

6.9. Effective corporate governance and risk culture

6.9.1. The Partnership is aware that the effective functioning of the corporate governance system and the improvement of the risk management system play an important role in ensuring sustainability, increasing competitiveness and investment attractiveness, and creating value for participants.

6.9.2. In order to further develop the corporate governance system and improve the risk culture, the Partnership is making efforts to consistently integrate the principles of sustainable development into the corporate governance system, decision-making processes and the risk management system.

Structure and effectiveness of corporate governance

6.9.3. In developing the corporate governance system, the Partnership focuses on the best international practices and makes efforts to further improve corporate governance practices by integrating the principles of sustainable development into the corporate governance system in order to:

- improving the efficiency of the work of the bodies of the Partnership;
- increasing the degree of involvement of top management;
- effective interaction with key stakeholders;
- introducing the principles of sustainable development into key internal corporate documents regulating the functioning of the corporate governance system;
- improvement of the management system and processes of the Partnership.

The effectiveness of the decision-making system

6.9.4. The integration of sustainable development principles into decision-making processes involves the development and adoption of management decisions based on a thorough analysis of the relationship between the internal priorities of the Partnership with priorities relating to sustainable development and corporate governance, taking into account:

- assessment of key sustainability risks in terms of potential impact on health, safety and labor protection, environment, quality of life of local communities, reputation,

compliance with legal and regulatory requirements and ensuring business continuity;

- assessment of expected benefits and contribution to the achievement of goals, objectives and opportunities for sustainable development;
- evaluation of the effectiveness of the use of financial, natural and human resources.

Risk management system

- 6.9.5. Risk management relating to sustainable development is carried out within the framework of the Company's corporate risk management system, which covers key risks relating to sustainable development, including the management of social, environmental and economic risks.
- 6.9.6. In order to identify and assess risks relating to sustainable development, the Partnership on a regular basis analyzes both internal and external factors influencing the achievement of goals and objectives relating to sustainable development and ensuring the continuity of the Partnership's activities.
- 6.9.7. The partnership, within the framework of the system of interaction with key stakeholders, promotes the active participation of stakeholders in the identification and assessment of significant risks relating to sustainable development.
- 6.9.8. The Partnership is taking steps towards a gradual transition to a risk-based approach to sustainable development management, which involves:
- identification and assessment of risks that have a direct impact on the long-term financial result and sustainable development of the Partnership;
 - development and implementation of measures for the effective management of these risks;
 - improving risk management practices relating to sustainable development and developing a risk culture to identify new opportunities to improve performance and obtain significant competitive advantages.
- 6.9.9. The Partnership, contractors and suppliers strive to apply all economically feasible measures to timely identify and effectively manage economic, social and environmental risks, and in the course of their activities use all opportunities in the social and environmental sphere to continuously promote sustainable development.

6.10. High ethical standards and anti-corruption

- 6.10.1. The Partnership in carrying out its activities adheres to high ethical standards and the principle of absolute rejection of corruption, fraud, abuse and other illegal actions.
- 6.10.2. As part of the development of a corporate compliance system, aimed primarily at ensuring that the activities of the Partnership comply with applicable Kazakh and international legislation governing human rights, health and safety standards, environmental protection and contribute to the prevention of corruption, ensuring fair competition, reliable taxation and presentation of financial information. The Partnership is making efforts to implement best practices and implement the following measures to prevent corruption offences:
- implementation of the corporate Code of Ethics and Compliance in the activities of the Partnership;
 - increasing the level of anti-corruption culture by informing and training employees on anti-corruption issues;
 - assessing compliance risks, identifying and monitoring the implementation of measures to mitigate identified and assessed risks;

- implementation of control procedures, including comprehensive due diligence of third parties;
- introduction of a line of proactive reporting on alleged violations of regulatory requirements on combating corruption and the provisions of the corporate Code of Ethics and Compliance (“hot line”);
- development and strengthening of the corporate practice of the Ombudsman institution;
- conducting investigations of cases of violation of regulatory requirements on combating corruption and the provisions of the corporate Code of Ethics and Compliance, taking corrective measures and improving control procedures.

6.10.3. The Partnership expects that business partners, contractors, suppliers and other third parties who work with or represent the Partnership will adhere to the ethical principles and standards of conduct reflected in the Partnership's Code of Ethics and Compliance and/or other similar documents on compliance and compliance with legal requirements, international standards and best practices.

6.10.4. The values and principles of the Partnership, ethical principles of conduct when interacting with a wide range of external and internal stakeholders, as well as business rules are set out in the Code of Ethics and Compliance.

6.11. Responsible Purchasing

6.11.1. The Partnership recognizes that the scale, nature and potential of the procurement activities required to carry out production and economic activities can have a significant impact on supply chains and a wide range of stakeholders, which, in turn, can affect the degree of impact of the Partnership on the environment, social - economic development of the regions of presence and local communities.

6.11.2. The Partnership adheres to the principles of good business conduct, publicity, transparency of procurement, development of fair competition, optimal and efficient spending of money in the implementation of procurement activities, including the selection of suppliers and contractors.

6.11.3. The Partnership is aware of the level of its responsibility for the use of industrial safety, health protection, environmental protection, social standards and makes efforts to develop mutually beneficial partnerships and improve the efficiency of interaction with suppliers and contractors in order to constantly improve and implement best sustainable development practices within the supply chain.

6.11.4. To this end, the Partnership is making efforts to improve the efficiency, control and transparency of procurement activities, including the implementation of the following activities:

- development and improvement of the practice of category management of procurement of goods, works and services in order to optimize costs in the medium and long term;
- improving the efficiency of inventory management;
- evaluation and development of suppliers, including the evaluation of the effectiveness of suppliers, the development of programs for their development, the formation and maintenance of databases of qualified/unscrupulous suppliers for the pre-qualification selection of potential suppliers;
- increasing the share of local content;
- definition, formalization and implementation of best procurement management practices.

6.11.5. The Partnership seeks to encourage the adoption by its contractors and suppliers of socially responsible and ethical business practices and adherence to the principles of sustainable development.

6.12. Responsible Business Conduct – interaction with Stakeholders, Local Communities and Reporting

Interaction with stakeholders and Community Development

6.12.1. Interaction with stakeholders is based on mutual trust and responsibility, respect for the interests of the parties.

6.12.2. The production, economic, social and environmental activities of the Partnership make a comprehensive contribution to the sustainable development of the regions of presence. The Partnership is making efforts to improve the standard of living and well-being of the population in the regions of presence by investing in the development of regions and related industries, the construction of social facilities and infrastructure, as well as creating jobs, paying taxes and developing the social sphere.

6.12.3. In accordance with the principles of social responsibility and sustainable development, when carrying out activities to interact with local communities and develop uranium mining regions of presence, the Partnership strives for a constructive dialogue and effective interaction with stakeholders.

6.12.4. As part of its interaction with stakeholders and local communities and the development of uranium mining regions of presence, the Partnership implements activities in the following areas:

- development of social infrastructure of settlements;
- support for programs for the development of health care, physical culture and sports;
- support for secondary and higher professional education;
- support for the development of small and medium-sized businesses.

6.12.5. The Partnership's obligations to support and develop local communities are contained in the provisions of the Partnership's Corporate Social Responsibility Policy.

7. FINAL PROVISIONS

7.1. This Policy is subject to periodic evaluation, revision and updating every 5 (five) years or, as necessary, to reflect changes in the current legislation of the Republic of Kazakhstan, the requirements of Samruk-Kazyna JSC, NAC Kazatomprom JSC, the requirements of international standards and best practices in sustainable development.

7.2. For the purpose of balanced sustainable development, the Partnership intends to:

- ensure the implementation of the Policy in harmony with the adopted program and other corporate documents;
- improve corporate practices relating to sustainable development;
- improve the practice of interaction with key stakeholders for their active involvement in the implementation of activities and the achievement of sustainable development goals;
- ensure the maximum possible transparency and openness of non-financial activities;
- promote the dissemination and implementation of responsible business practices among its business partners, including key contractors and suppliers.
